

Siberian Swan pointe shoes Features at glance –

Unique combination of plastic shank and standard yet reinforced box.

Shank.

MADE OF ENGINEERED PLASTIC: Makes the shoes far more durable and longer lasting. The weight of the shoe is lighter. No need to break in the shoes; they are flexible out of the box. Additional flexibility is added for rolling through demi-pointe. If you simply walk in the shoes a little before practicing, your body temperature will make the shank more flexible. The firmness of the shank is customizable, it is controlled by its thickness of the shank, which gets created by the computerized process with precision up to 0.5 mm.

CURVED:

The slightly curved shanks add a beautiful aesthetic look as the shoes instantly mold to your foot. It also provides support in conjunction with *Active Arch Support*.

SOFT FABRIC padding added to inner-sole provides additional comfort.

Active Arch Support

Our patented *Active Arch Support* is located in the middle of the shank underneath the heel where it provides additional support while on pointe. It reduces the pressure on the toes and adds stability.

Box Tapered box for additional support, and elegance, made off standard (non-plastic) materials. Malleable yet firm.

Reinforced with additional epoxy at the platform area for long lasting. Padding on the platform to reduce noise.

Inner-sole Layer of padding is added for additional comfort

V Shape & Drawstrings on the side

Combination of V shape & drawstrings is a unique feature

Fabrics Multiple vacuum pressed layers of fabric that is stronger, longer lasting, and less slippery than standard satin

Heel Siberian Swan comes in standard and elastic heel. "Standard" heel is the standard non-stretch fabric.

"Elastic heel" is the unidirectional stretched fabric that goes from the middle of the foot to the heel.

At this time the fabrics for elastic heel under development.

Color Siberian Swan standard color is pink-beige with a little shine in it. Color-matched with the drawstrings on the sides, ribbons, and tights. Various colors are available for special orders.

Platform & Elastics

Siberian Swan comes in standard (Pavlova), and slightly wider (Karsavina) platforms.

A layer of foam inside the platform makes the shoes quieter.

A handmade platform cover that provides protection to the platform and increases its longevity is optional.

The shoe comes with the ribbons, and color matched mesh elastics.
Attached with a cross pattern or heel to heel, It helps to hold the shoes perfectly, and gives a nice snug fit.
Can be used to lengthen the vamp, just sew it into the vamp to make it higher and more supportive without compromising demi-pointe.
It's wide, stretchy, comfortable, and secure.

Siberian Sedar Extract

Cedar oil contains proteins, fats, healthy acids, and vitamins. Healing power for your feet.

Ribbons Siberian Swan color matched ribbons.

Pointe Shoes
SIBERIAN SWAN
make a pointe

Siberian Swan derived its name from one of the most beautiful regions of Russia and the most iconic symbols of classical ballet.

Professional dancers from The State Ballet of Siberia took important part in the development as well as being testing platform for this unique brand. Ballet Schools worked closely with us to provide their feedback, and we are proud and appreciative of the entire team for their dedication, expertise, and professionalism

Your dancing experience is most important to us, so we focus our efforts on the comfort, elegance, and endurance of the shoes so you have the most pleasant "**worry-free**" one whether you are a student, professional or recreational dancer.

- Each step along the way with Siberian Swan
